Frequently Asked Questions

What is Agriplast Black Trellis Twine used for?

It is used to support plants and for stitching shade nets, providing stability to crops in greenhouses and net houses.

Is the twine UV stabilized?

Yes, it has high UV stabilization, ensuring durability and long service life even under direct sunlight.

How much weight can the trellis twine support?

It can take a load of 44-48 kg, making it strong enough for various agricultural applications.

What are the available roll sizes?

The twine is available in 800-meter and 1600-meter rolls, providing flexibility based on usage needs.

Can this twine be used for open-field farming?

Yes, it is suitable for both open-field and protected cultivation, offering strong support to climbing plants.

How does trellis twine benefit plant growth?

It helps train plants to grow upright, improves air circulation, and prevents fruit or vegetable contact with soil, reducing the risk of disease.

Does the twine degrade over time?

Since it is UV stabilized, it offers a long service life and does not degrade quickly under harsh weather conditions.

Is this twine reusable?

Yes, with proper handling, it can be reused across multiple growing seasons.

Where can this product be shipped from?

It is dispatched from Hosur or Ahmedabad with immediate delivery.

Can the twine be used for heavy crops like tomatoes or cucumbers?

Yes, due to its high load-bearing capacity (44-48 kg), it is ideal for supporting crops like tomatoes, cucumbers, beans, and other climbing plants.
