Agriplast Ginegar Hole Mulch

Boost Yields with Agriplast Ginegar Hole Mulch

Agriplast Ginegar Hole Mulch offers 100% virgin LDPE with zero light transmission, available in White-Black for hot areas and Silver-Black for winter, featuring 63mm punch holes.

3x

better weed control with zero light transmission

2x

improved fruit quality and yield

4x

more water conservation for sustainable farming

Use White-Black mulch in summer to keep soil cool and Silver-Black in winter for optimum warmth and growth.

Agriplast Ginegar Hole Mulch is made from 100% virgin LDPE with zero light transmission for complete weed control. Available in White-Black for hot regions and Silver-Black for winter cultivation, it features 63 mm and 75 mm precision punch holes for uniform plant spacing and optimum crop performance.

Agriplast Ginegar Hole Mulch, crafted from **100% virgin LDPE**, is designed to enhance crop yield and quality.

Available in **25, 30, 50, 100, and 200 microns**, it ensures **zero light transmission** to prevent weed growth and promote strong white root development.

Choose **White-Black for hot climates** to maintain cooler soil or **Silver-Black for winter planting** to retain warmth and improve fruit color.

With a **UV life of 9 months**, it conserves water, stabilizes soil temperature, and promotes uniform plant growth.

Offered in **1 m, 1.2 m, and 1.5 m widths**, with **63 mm and 75 mm punch holes** available in **single, double, or zig-zag patterns**, it's a versatile and high-performance solution for modern farmers.

Material	LDPE
Thickness	25 Microns, 30 Microns, 50 Microns
Light Transmission	No
UV Life	Up to 9 months*
Color	White-Black, Silver-Black
Available Width	1 meter, 1.2 meter
Recommended for	White-black is recommended for hot areas with a temperature above 30-35°C (summer planting). Silver-black is recommended for areas with a temperature below 30°C (winter planting)
Punch hole size	63mm
Hole Pattern	Single / Double / Zig-Zag
Port of Dispatch	Hosur

Frequently Asked Questions

What is Agriplast Ginegar Hole Mulch used for?

Agriplast Ginegar Hole Mulch is used to enhance crop yield, improve fruit color, conserve water, prevent weed growth, and promote better white root development in crops.

What are the available colors of Agriplast Ginegar Hole Mulch and their uses?

White-Black: Best for hot areas (above 30-35°C, summer planting) as it reflects heat and keeps the soil cooler., Silver-Black: Recommended for areas with temperatures below 30°C (winter planting) as it helps retain warmth.

What is the UV life of Agriplast Ginegar Hole Mulch?

The mulch is UV-stabilized and has a UV life of up to 9 months, depending on environmental conditions.

How does hole mulch help in weed prevention?

Agriplast Ginegar Hole Mulch has zero light transmission, preventing sunlight from reaching weeds and stopping their growth.

Can Agriplast Ginegar Hole Mulch be used for all crops?

Yes, it is suitable for various crops, including vegetables and fruits, especially those that require efficient water use and weed prevention.
