Frequently Asked Questions

What is the Agriplast Manual Roll-Up Unit used for?

It is designed to operate side roll-up curtains in greenhouses, helping regulate airflow, temperature, and humidity.

What are the key benefits of using this roll-up unit?

Effortless manual operation for easy ventilation control Improves temperature and humidity management inside the greenhouse Increases crop productivity by providing an optimal growing environment Durable and long-lasting with a sturdy design

What are the product specifications?

Torque: Standard for greenhouse applications Speed Ratio: 1 Maximum Roll-Up Length: ? 100 meters Maximum Roll-Up Height: ? 3 meters Recommended Use: High-side open greenhouses

How does this unit work?

The unit rolls up and down the greenhouse side curtains, allowing farmers to control ventilation manually. The side curtains help in reducing excess heat and improving air circulation.

Is this roll-up unit compatible with all greenhouses?

Yes, it is suitable for most greenhouse structures that require side roll-up curtain functionality.

Where is this product available for dispatch?

It is ready for immediate delivery from Hosur and Ahmedabad.
