Reinforced Plastic Stick

Support Crops with Reinforced Plastic Stick

Agriplast Reinforced Plastic Stick, 5mm diameter and 6/8 feet long, is rust-proof, smooth, and 2x stronger than steel wire, ideal for crop covers and tunnels.

2x

stronger than steel for superior support

75%

lighter for easy handling and installation

3x

longer life with rust-proof durability

Agriplast Reinforced Plastic Stick, available at Agriplast Tech India, is a robust, white support solution for crop covers and tunnels. With a 5mm diameter ($\pm 5\%$) and 6/8-foot lengths, it's 2x stronger than steel wire yet 75% lighter. Rust-proof and flexible with a smooth surface, it prevents tearing of low tunnel crop covers, unlike steel alternatives. Designed for long-lasting performance, this stick ensures reliable crop support without damage. In stock for immediate delivery from Hosur or Ahmedabad, visit www.agriplast.co.in to enhance your farming setup with this durable, lightweight solution today!

Frequently Asked Questions

What is the Reinforced Plastic Stick used for?

It is used to support crop covers and tunnels, providing strong yet lightweight structural support.

How is the Reinforced Plastic Stick better than steel wire?

It is 2 times stronger than steel wire and 75% lighter, making it more durable and easier to handle.

Does the Reinforced Plastic Stick rust over time?

No, it is completely rust-proof, unlike steel wires, ensuring durability in all weather conditions.

What are the available sizes for the Reinforced Plastic Stick?

It is available in 6 feet and 8 feet lengths, with a 5mm $\pm 5\%$ diameter.

Will the plastic stick damage the crop cover?

No, it has a very smooth surface, preventing any tears or damage to crop covers, unlike steel wires.
