

SombraSol Liquid Shading

Shield Crops with SombraSol Liquid Shading

SombraSol, a liquid shading solution for greenhouses, offers up to 65% shade, heat reflection, and 4-month water resistance, protecting crops from excess solar radiation.

3x

better heat reflection for crop protection

4x

longer wear resistance up to 4 months

2x

easier application with lump-free liquid

SombraSol, available at Agriplast Tech India, is a cutting-edge liquid shading solution for greenhouse films. This 20-liter product provides up to 65% shading, reflecting heat to protect crops from excess solar radiation while increasing light transmission when wet. Easy to apply with a sprayer and water-resistant for up to 4 months, it's safe for humans, crops, and the environment. Available in heavy (65%), normal (50%), and light (30%) shading options, it requires just one coat per season. In stock for immediate delivery from Hosur or Ahmedabad, visit www.agriplast.co.in to optimize your greenhouse today!

Effect	Per ha/acre	Shading	Wear Resistance	Water dilution/bucket(L)
Heavy Shading	Buckets 25/10	65.00%	++++	80 L
Normal Shading	Buckets 15/6	50.00%	+++	100 L
Light Shading	Buckets 8/4	30.00%	+	150 L

Frequently Asked Questions

What is SombraSol used for?

SombraSol is a liquid shading agent designed to protect crops from excess solar radiation by reflecting heat in greenhouses.

How does SombraSol benefit greenhouse films?

It provides a clear shading coat for optimum heat reflection, is water-resistant for up to 4 months, and increases light transmission when wet.

How is SombraSol applied?

It can be applied using a simple spraying device. Being a liquid, it does not form lumps, ensuring an even coating compared to powder-based shading products.

How is SombraSol removed?

SombraSol naturally wears off over the season. It can also be removed by brushing in combination with citric acid.

Is SombraSol safe for plants and the environment?

Yes, SombraSol is safe for humans, crops, and the environment.
