Frequently Asked Questions

What is the Strawberry Container (Open Type)?

It is a specialized soilless growing trough designed for strawberries, lettuce, kitchen gardens, and terrace farming.

How is the Open Type different from the Close Type container?

The Open Type container allows better aeration and drainage, making it ideal for environments where excess moisture needs to be controlled. The Close Type retains more water, which can be beneficial in certain hydroponic systems.

What are the key features of this container?

Made of polypropylene for strength and durability 700-micron thickness ensures a sturdy structure UV stabilized with a 5-year guarantee (life expectancy of 10+ years) White color to reflect sunlight and prevent overheating Designed to hold growing media and allow plant roots to spread efficiently

What crops can be grown in this container?

It is suitable for strawberries, lettuce, and other plants in kitchen gardens and terrace farms.

What are the dimensions of the trough?

The trough size is 10 cm-20 cm-10 cm, making it compact yet efficient for soilless farming.
