Available Length	50 Meter, 100 Meter
Recommended for	Greenhouse, Net house, Walk-in Tunnels, Open field
Delivery time	Immediate
Port of Dispatch	Hosur/Ahmedabad

Frequently Asked Questions

What is an Insect Net, and how does it help farmers?

An Insect Net is a protective mesh that prevents harmful insects and pests from damaging crops, helping to reduce pesticide use and improve yield.

What are the key benefits of using an Insect Net?

Pest exclusion – Blocks insects like aphids, thrips, and whiteflies.

Disease control – Prevents pest-borne plant diseases. Pollination

control – Allows selective entry of beneficial pollinators. Climate

control – Creates a stable microclimate for crops. Reduced pesticide

use – Supports sustainable farming.

What are the available mesh sizes for the Insect Net?

The net is available in 40 mesh and 50 mesh, offering protection against different types of insects.

Is the Insect Net UV stabilized?

Yes, it is UV-stabilized to ensure durability and long-lasting performance.

How long does the Insect Net last?

The net has a UV life of 5 years, ensuring reliable crop protection over multiple growing seasons.
