Self Drilling Screw

Fasten Securely with Agriplast Self Drilling Screw

Agriplast Self Drilling Screw, a 10mm x 20mm zinc-plated SS/MS fastener, ensures strong fixing of profiles in GI structures for greenhouses and net houses.

3x

stronger hold with self-drilling design

2x

more corrosion resistance with zinc plating

4x

easier installation for GI structure fixing

Agriplast Self Drilling Screw, available at Agriplast Tech India, is a versatile 10mm x 20mm fastener made from stainless steel (SS) or mild steel (MS) with zinc plating. Conforming to DIN standards, this round-head screw is ideal for securing profiles to GI structures in greenhouses and net houses. Its self-drilling design simplifies installation, offering durable, corrosion-resistant performance. Available in various sizes and materials, it's in stock for immediate delivery from Hosur or Ahmedabad. Visit www.agriplast.co.in to ensure robust, long-lasting fixes for your greenhouse setups with this reliable screw today!

Material	SS and MS
Plating	zinc
Standards	DIN
Size	10 mm x 20 mm
Type of Bolts	Round-head
Recommended for	Fixing of profile in GI Structure under Greenhouse/Net house
Delivery Time	Immediate
Port of Dispatch	Hosur/Ahmedabad

Frequently Asked Questions

What is the purpose of the Agriplast Self Drilling Screw?

It is used for fixing the profile in a GI structure, primarily in greenhouses and net houses.

What materials are used in the self-drilling screws?

The screws are available in stainless steel (SS) and mild steel (MS) with zinc plating for corrosion resistance.

What is the standard size of the self-drilling screw?

The standard size is 10mm x 20mm, making it suitable for securing greenhouse profiles.

Does the screw comply with any industry standards?

Yes, it follows DIN standards, ensuring high-quality manufacturing.

Is the screw rust-resistant?

Yes, the zinc plating provides rust resistance, making it ideal for greenhouse environments.

Can these screws be used in other applications besides greenhouses?

While designed for greenhouses and net houses, they can also be used for other metal structures requiring a strong, rust-resistant fastener.

Do I need pre-drilling before using these screws?

No, these are self-drilling screws, which means they do not require pre-drilling and can be installed directly.

What type of head does the screw have?

It has a round head, which provides secure fastening and even pressure distribution.

Where are these screws dispatched from?

They are available for immediate delivery from Hosur or Ahmedabad.
